

The Cheerful Life

It is the right of everyone to live and enjoy the cheerful life. We owe it to ourselves and those who live with us to live the cheerful life. We cannot do so if ill health takes hold of us.

The wife, mother and daughter suffering from hot flashes, nervousness, headache, backache, dragging-down feeling, or any other weakness due to disorders or irregularities of the delicate female organs—is not only a burden to herself, but to her loved ones.

There is a remedy. Forty years experience has proven unmistakably that

DR. PIERCE'S Favorite Prescription

will restore health to weakened women. For 40 years it has survived prejudice, envy and malice. Sold by druggists in liquid or tablet form. Dr. Pierce's Favorite Prescription Tablets can be had of druggist or mailed on receipt of one-cent stamps—10c \$1.00 or 50c size. Address R. V. Pierce, M. D., Buffalo, N. Y.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. Sugar-coated, tiny granules.

PROTECTION AGAINST "WORMY" FRUIT.

The fruit crop of nineteen-fourteen promises to be a very good one. The trees have passed the winter in good shape and unless a severe freeze occurs within the next few weeks the indications are that Kentucky will enjoy a banner fruit year. The interest in the production of better fruit has been very gratifying and many orchards that have been neglected for some time past have been pruned, sprayed and otherwise put in condition.

The spray that has been applied up to the present time has been the dormant application for San Jose scale principally. Many growers who are just starting to care for their orchards feel that this application is sufficient. They should remember that this application is made more as a protection to the tree and not so much for the fruit itself. The application that is to show greater results from a fruit standpoint has yet to be made, and it is known as a codling moth spray.

The codling moth is the insect that causes the apples to become "wormy" and drop off permanently. It is safe to say that over fifty per cent. of the apples raised in the State are infested with the larvae of this insect. The moth is grayish brown in appearance and usually flies at night. The female moth deposits her eggs on the calyx end of the fruit and on nearby leaves and branches about blossoming time. The eggs hatch in from five to ten days after they are laid. As soon as the worm hatches it crawls to the open calyx of blossom end.

Advantage should be taken of the fact that the worm enters the open calyx of the apple and an attempt should be made to spray the trees just after the blossoms drop and before the calyx cap closes. If the spraying is delayed too long the calyx cap closes around the worm and it is impossible to reach it with poison. This spray should be directed down into the blossom with as much force as possible.

Arsenate of lead and Paris green are the principal poisons used in combating this insect. Of the two, arsenate of lead is preferable because it adheres better and because it is not so liable to burn the foliage. It should be used at the rate of three pounds of arsenate of lead to fifty gallons of water. Paris green should be used at the rate of five to eight ounces to fifty gallons of water. One gallon of lime-sulfur should be added to forty gallons of the spray because of its value in checking the different fungous diseases, such as black rot and apple scab.

In this section there are two broods of codling moth in a year. The second brood usually makes its appearance from the middle of July to the first of August. The same spray as given above may be applied. If bitter rot is troublesome, Bordeaux mixture should be substituted for the lime-sulfur.

These sprayings are very important from a fruit standpoint. Particular effort should be made to place some of the material in every calyx cup. It is not so necessary to try and spray every leaf, but the operator should aim to reach all of the fruit.

IMPROVED HOUSING SCHEME IN OLD LONDON DISTRICT.

The duchy of Cornwall estate in South London, which belongs to the Prince of Wales, is being transformed under an improved housing scheme. Already a marvelous change has been wrought in the aspect of the neighborhood. Old and dilapidated houses in narrow and tortuous streets have given place to substantially designed flats and cottages, abutting on thoroughfares which have been laid out according to sound town planning principles, so that the maximum of light and air and convenience will be enjoyed by the tenants. King George has taken a keen interest in the reform.

All Growing Children

are dependent on nourishment for growth. Their health as men and women is largely established in childhood.

If your child is languid, bloodless, tired when rising, without ambition or rosy cheeks, Scott's Emulsion is a wonderful help. It possesses nature's grandest body-building fats so delicately predigested that the blood absorbs its strength and carries it to every organ and tissue and fibre.

First it increases their appetite, then it adds flesh—strengthens the bones—makes them sturdy, active and healthy.

No alcohol or narcotic in Scott's Emulsion, just purity and strength.
